TODDLER WORLDS

colourful, safe, sustainable

More fun for the little ones

With the new toddler elements made of rubber granulate, you can design individual playscapes for the little ones. No matter whether it is an underwater world or a colourful flower meadow, there are no limits to the imagination. The material used remains soft and warm in every season. Tunnel, sandpit and mountain invite to creativeplay and climb. Perfect for nurseries and pedestrian zones.

Unique play areas for all ages!

Even on small areas, they offer maximum fun. The Terra-soft toddler elements can be built as a group, so that small impact areas are created. The slip-resistant surface of the elements provides a secure grip for small feet.

- ✓ for children from 1 year on
- ✓ made of EPDM rubber granulate
- ✓ permanently soft and warm
- ✓ 8 elements in 4 colours
- ✓ certified according to DIN EN 1176
