

Terrasoft®

Lamp Gratus

Terrasoft lamps cut a good figure in any garden and provide an inviting, warm light. They can be perfectly combined with any kind of outdoor furniture and fit in perfectly, especially to modern architecture. With ease, you create a harmonious overall appearance with the products from the Terrasoft range in the outdoor area. The extraordinary design of the lampshade with Leoprint is the eye-catcher on terraces. The shade of the lamp creates a very warm light through the pattern, and conjures up a wonderfully cozy atmosphere in outdoor living areas, or even indoors.

The high-quality fabrics are weatherproof, robust and easy to clean. The lights are suitable for all classes of bulbs. We recommend a 9W energy saving lamp.
