

## Terrasoft® Stadium seat

Seats for stadiums and sports arenas have to endure a lot - and at the same time be comfortable. The weatherproof Terrasoft Stadium Seat combines both: a steel core is covered with a layer of soft rubber, so that the surface of the seat is always warm and soft. This material meets the highest standards of comfort and quality: it is almost unbreakable, and it is suitable for permanent outdoor use. The seat can be easily mounted on existing equipment, for example on cement steps or other mounting surfaces.

Supplied with: Stadium seat made of soft rubber  
In addition, you will need: Mounting material (bolts, nuts, etc.)

### ADVANTAGES

- soft material
- comfortable, ergonomically shaped seat
- very robust
- cold protection
- low maintenance
- highly-resistant

### APPLICATION

The stadium seat can be used in sports stadiums, gymnasiums or football fields.
