

Terrasoft®

Vase Cylindrus | 1000.750.500

This Terrasoft vase skilfully stages the interior as well as the exterior as a space-creating element. From matt red to metallically brilliant gold, it is available in five different colours and in heights 1000 mm, 750 mm and 500 mm. The different heights can be combined with each other and are highlights in the outdoor area, both individually and in groups. Plant arrangements with that certain something look particularly impressive in the vase cylindrus with height of 750 mm. Its straight shape makes the plants look their best. The positive characteristics of the vases made of rubber granulate are not only the insulating effect, but also their high weight and resistance to breakage - because of frost as well as due to minor contact with vehicles.

ADVANTAGES

- unique design object
- stylish
- UV resistant
