

Terrasoft®

Vase Linea VA | 1000.750.500

Simple and elegant in design, sophisticated and functional in the material - these attributes characterise the plant pot Linea Edelstahl and make it a vase with high design standards. The stainless steel base raises the vases by 20 cm, so that plants and arrangements are more the focus of attention. Moreover, the stainless steel foot protects the vase of rubber granulate against splashing water and is very easy to keep clean. Air can circulate under the vase, which provides extra insulation against the cold, especially during the winter months. The insulating effect of the rubber granulate allow plants to survive the winter.

ADVANTAGES

- unique design object
- weather and frost proof
- theft-proof: high dead weight
- UV resistant
- perfect cleanliness in the bottom area of the vase
- insulating: the plants are also protected in the winter months
- shatterproof: Rubber granulate adapts to the weather
- including inner pot

APPLICATION

The Terrasoft vases made of pure rubber granules are set on the stainless steel base. The Design Vase embellishes entrances, paths and gardens alike.

Colours

-13x anthracite
-17x silvergrey
